

How to submit your work

1. Add a new project (or edit an existing one) and name it according to the name of your work. This will be your "portfolio" containing all the information you wish to present on your work.
2. Add a new card on your list and put all the information there. The required information are:
 - Your name/Team members and contact details of a contact person
 - Short description of the work (max 250 words)
 - Pictures/Screenshots of the work
 - A link to the final work and/or other relevant material online
3. Write down the name(s), contact details and the short description in the "Description" area on the top of the card. Add pictures and possible links as attachments.
4. Add a relevant tag(s) to your project: Art & Design, Data visualisation, Digital Humanities, Digital Storytelling, Education, Nordic, Digital Fabrication, Creative Ring Challenge or Open.
5. You can also add additional materials and links (e.g. project website/blog, videos on the progress of the work), but please bear in mind that less is more. Remember also to edit only your own list.

You can update information added in your list up to the submission deadline.

After 31 March 2016 we ask you not to make any changes to your HackDash project, as the members of the jury and other participants of the competition will evaluate your work until 13 April 2016.
